MAS-W- 332

18 February 1952

Chief of Base, Salzburg  
Attn: ☐  
Chief, EE

Operational

Wilhelm HOSTTL's approach to Gruesone 201

HAAS

Reference: MASA 1205, SALZ 238 and WASH 22315

1. Further discussions here lead us to feel action as proposed in Para 3, MASA 1205 may be somewhat premature. A well documented case of CAPOTE's use of unacceptable ex-BSHA types such as HOSTTL could very well give us sufficient leverage to resolve any ZIPPER-CAPOTE differences which might arise in the future, to our advantage.
2. ☐ proposes discussing this case with you on his coming field trip. It is suggested no action be taken pending this discussion.
